4 Courses

Software Design as an Element of the Software Development Lifecycle

Software Design as an Abstraction

Software Design Methods and Tools

Software Design Threats and Mitigations

Jan 15, 2021

JOANNA MAE CABUYADAO

has successfully completed the online, non-credit Specialization

Secure Software Design

This specialization is for those with limited workplace experience in software development to obtain the background, perspective and skills to recognize important security aspects of software they are expected to design. Mindsets and attitudes of successful designers--and hackers--are presented as well as project successes and failures

Albert E. Glock, Jr.
